

Wiring Diagram for Separate Charging/Balancing Connector

This diagram shows the typical wiring for a 3 cell pack. We have drawn this using “can” type batteries just for display purposes only. You can see from the diagram that:

- *The black wire is the negative for cell #1
- *The blue wire is the positive for cell#1 and the negative for cell#2
- *The yellow wire is the positive for cell#2 and the negative for cell#3
- *The red wire is the positive for cell#3
